NÖRGRU™
TERMS OF SERVICE (TOS)

Last Updated: September 12, 2026

Welcome to NÖRGRU ("Company," "we," "us," or "our"). These Terms of Service ("Terms") govern your access to and use of our website, software applications, tools, digital products, 3D assets, internal portals, and associated services (collectively, the "Services").

By accessing, purchasing, uploading, contributing to, or using any part of the Services, you agree to be bound by these Terms. If you do not agree to all applicable terms and conditions, you may not access or use our Services.

1. DEFINITIONS AND CLARITY OF ROLES

- "Product Edition": The NÖRGRU classification describing the principal scope and intended use of a Digital Content package: Level 1 — Visual, Level 2 — Technical, or Level 3 — Manufacturing.
- "Level 1 — Visual": A Digital Content package principally intended to provide a visual representation of an object, concept, environment, system, or design. It may be highly detailed and may be supplied in mesh, CAD, NURBS, or other digital geometry formats.
- "Level 2 — Technical": A Digital Content package providing a more extensive technical representation, which may include interiors, assemblies, mechanisms, internal structures, CAD/NURBS geometry, STEP, IGES, or other technical formats. Level 2 does not by itself grant manufacturing rights.
- "Level 3 — Manufacturing": A controlled product category involving engineering/manufacturing-oriented technical material and a separately negotiated Manufacturing License. Level 3 is not merely a higher polygon count or file-format tier.
- "Manufacturing Content": Technical files, documentation, drawings, specifications, engineering data, system definitions, production information, or other materials designated for a Level 3 transaction.
- "Manufacturing License": A separately negotiated license governing authorized access to and use of Level 3 Manufacturing Content, including any development, prototyping, manufacturing, commercialization, territory, field-of-use, exclusivity, quantity, confidentiality, support, and other rights expressly granted.
- "Level 3 Portal": A controlled NÖRGRU digital environment through which an authorized Manufacturing Licensee may access project-specific Manufacturing Content, documentation, revisions, notices, and related resources.
- "Strategic IP": Digital Content or technical information that NÖRGRU designates as having potentially significant inventive, technological, commercial, proprietary, or development value beyond ordinary marketplace use.

To eliminate ambiguity throughout this document, the following terms are defined:

- "Customer" / "Buyer": Any individual or entity that purchases, downloads, or licenses digital products, 3D assets, textures, software tools, or other Digital Content through NÖRGRU.

- "Contributor" / "Collaborator": Any creator, designer, artist, developer, engineer, or other approved individual who submits Digital Content to NÖRGRU for distribution, sale, publication, or other approved use.
- "Employee": An individual employed by NÖRGRU under a separate employment relationship or agreement.
- "Team Member": A Contributor, Collaborator, Employee, contractor, or other person formally accepted into an internal NÖRGRU program or team structure.
- "Digital Content": 3D models, procedural textures, software tools, scripts, materials, plugins, documentation, visual assets, and related digital files hosted, distributed, or sold through NÖRGRU.
- "Platform": The NÖRGRU website, storefronts, internal systems, third-party checkout/distribution services, and other infrastructure operated or utilized by NÖRGRU.
- "NÖRGRU Assistant": NÖRGRU's internal dashboard and portal through which approved Team Members may access sales information, learning resources, internal materials, progression-based resources, and other Company functions.

2. ACCOUNT REGISTRATION AND ELIGIBILITY

- Age Requirement: You must be at least 18 years of age (or the legal age of majority in your jurisdiction) to enter into a binding agreement or use the Services.
- Account Accuracy: You agree to provide true, accurate, current, and complete information during registration, onboarding, checkout, or participation.
- Account Security: You are responsible for maintaining the confidentiality of credentials and for activities occurring under your account.
- Internal Access: Certain NÖRGRU systems, including NÖRGRU Assistant, are invitation-only or approval-based. NÖRGRU may pre-authorize or provision accounts for approved Team Members rather than permitting unrestricted public registration.
- Approval Status: Submission of an application, expression of interest, portfolio, or other preliminary information does not itself create Contributor, Employee, or Team Member status.

3. CUSTOMER LICENSING AND DIGITAL ASSET USAGE

3.1A Product Editions and Scope

NÖRGRU may classify Digital Content as Level 1 — Visual, Level 2 — Technical, or Level 3 — Manufacturing. The classification concerns the content package, intended use, disclosure scope, and licensing rights rather than polygon count, modeling software, topology, or file extension alone.

Level 1 and Level 2 products may be offered through ordinary NÖRGRU checkout and third-party digital distribution infrastructure such as Payhip, subject to the product page and applicable license terms.

Level 3 products, where available, are not ordinary downloadable marketplace products by default. Access is subject to a request, review, and separate Manufacturing License or other written agreement expressly governing the transaction.

3.1B Standard License Exclusion for Level 3

The Standard License does not grant Manufacturing Rights or unrestricted access to Level 3 Manufacturing Content. A Customer may not infer manufacturing authorization from possession of a Level 1 or Level 2 model, including a model supplied in STEP, IGES, NURBS, native CAD, or another technically precise format.

Where a product page identifies a product as Level 3 — Manufacturing, or otherwise states that Manufacturing Content is controlled, the applicable Manufacturing License Agreement and any expressly incorporated documents govern access and permitted use.

3.1 Commercial License Grant

Unless otherwise specified on a product page, every purchase of Digital Content from NÖRGRU grants the Buyer a non-exclusive, perpetual, worldwide, non-transferable, royalty-free commercial license to use, modify, and integrate the Digital Content into commercial and non-commercial projects.

3.2 Permitted Uses

Under the Commercial License, Buyers MAY:

- Incorporate Digital Content into rendered images, animations, video games, film/TV productions, architectural visualizations, interactive media, and software applications.
- Modify, adapt, sculpt, re-texture, or alter Digital Content to fit specific project requirements.
- Distribute Digital Content as an embedded, non-extractable component of a compiled software or media product.

3.3 Express Prohibitions (No Ambiguity)

Under NO circumstances shall the Buyer:

- Re-sell or Redistribute: Re-sell, redistribute, sublicense, share, transfer, or upload original or modified raw asset files to any third party, public repository, torrent site, or competitor platform.
- Standalone Asset Distribution: Package, bundle, or include NÖRGRU Digital Content as part of an asset library, stock media marketplace, 3D asset store, or content generator.
- Extraction: Distribute executable applications or games in a manner where source 3D files or raw texture maps can be easily extracted by end-users.
- AI Training: Use any NÖRGRU Digital Content, including models, renders, or procedural materials, to train generative AI models, machine learning systems, or automated asset-generation tools without prior explicit written consent from NÖRGRU.

4. CONTRIBUTOR AND COLLABORATOR TERMS

4.1 Intellectual Property Ownership

NÖRGRU operates under a strict principle of respecting creator rights:

- 100% IP Retention: Contributors retain 100% intellectual-property ownership of their original assets submitted to or hosted on NÖRGRU.

- License to NÖRGRU: By submitting assets, Contributors grant NÖRGRU a non-exclusive, worldwide, royalty-free license to host, display, promote, market, distribute, and sell the asset on behalf of the Contributor.

4.2 Revenue Sharing and Automated Payouts

- Split Ratio: Revenue generated from Contributor sales is normally split 60% to the Contributor and 40% to NÖRGRU, unless a separate written agreement specifies otherwise.
- Gross Sale Basis: Unless expressly stated otherwise for a particular product or agreement, the Contributor's 60% share is calculated from the published sale price before ordinary payment-processing and platform fees.
- NÖRGRU Costs: Payhip, PayPal, Stripe, or equivalent processing and operational costs attributable to the transaction are ordinarily borne from NÖRGRU's 40% share, subject to processor rules, taxes, refunds, chargebacks, currency conversion, and applicable law.
- Payment Processing: Sales and revenue distributions may be managed through automated third-party processors such as Payhip, PayPal, Stripe, or equivalent services.
- Automated Payouts: Eligible payouts are intended to be automatically initiated following a successful transaction, but actual availability may be affected by processor holds, chargebacks, refunds, verification, technical issues, currency conversion, or legal requirements.

4.3 Asset Modification and Delisting Rights

- Full Control: Contributors retain control over their intellectual property and may request modification or complete delisting of their listed assets at any time.
- Delisting Effect: Upon a valid removal request, NÖRGRU will remove the asset from public sale within five (5) business days where reasonably practicable, and will delete NÖRGRU-held copies from its operational files/archive where appropriate.
- Existing Licenses: Delisting does not revoke or affect licenses previously acquired by Customers prior to the removal date.

5. CONTRIBUTOR WORKLOAD, INDEPENDENCE, AND EXPECTATIONS

5.1 No Mandatory Production Schedule

NÖRGRU does not ordinarily impose fixed working hours, mandatory asset quotas, recurring deadlines, or a predetermined number of products upon Contributors. Contributors determine their own working schedule, creative process, production pace, and objectives, subject to the requirements of these Terms and any separate written agreement.

5.2 Creative Independence

Contributors retain substantial creative independence regarding what they create, how they create it, and when they work. NÖRGRU provides a curated platform and commercial opportunity rather than requiring Contributors to operate under a conventional employment-style production schedule, unless a separate employment or service agreement provides otherwise.

5.3 Quality and Vision Remain Mandatory

Creative independence does not eliminate NÖRGRU's quality, technical, presentation, licensing, legal, or brand standards. Contributors are expected to produce work compatible with the Company's established vision and standards as described in Section 16.

5.4 Sales Are Not Guaranteed

NÖRGRU cannot guarantee that any particular product will sell, nor can it guarantee a minimum level of revenue, customer interest, visibility, or commercial success. Contributors determine their own objectives, while market demand remains outside NÖRGRU's control.

5.5 Inactivity and Contributor Status

NÖRGRU may distinguish between an approved and active Contributor and an individual who merely expressed interest but never completed the onboarding process or submitted approved Digital Content.

Where an active Contributor who has previously submitted at least one approved product becomes inactive for a prolonged period, NÖRGRU may contact that Contributor and provide reasonable notice before ending their active status, except where immediate action is required for security, legal, confidentiality, misconduct, or other serious reasons.

An individual who expresses interest but fails to complete required onboarding, fails to establish required payment infrastructure, or submits no approved Digital Content may be removed from the prospective Contributor pool without prior notice. NÖRGRU is not required to maintain indefinitely inactive or non-participating prospective memberships.

5.6 Ending a Collaboration

A Contributor may request to end their collaboration with NÖRGRU at any time. Unless a separate written agreement provides otherwise, no minimum service period or continuing production obligation applies.

Upon termination at the Contributor's request, NÖRGRU will remove the Contributor's listed Digital Content in accordance with Section 4.3. The Contributor's intellectual property remains theirs, and existing Customer licenses remain unaffected.

5.7 Independent Work

Contributors remain free to create and commercialize their own work independently, subject to Section 17 regarding pricing consistency and any separate written agreement. NÖRGRU does not automatically impose platform exclusivity upon Contributors.

6. PURCHASES, PAYMENTS, AND REFUND POLICY

- Pricing: Prices are stated at checkout and may be displayed in EUR, USD, or another supported currency. Applicable taxes may be additional unless explicitly stated.
- Taxes: The Customer is responsible for applicable VAT, sales tax, duties, or other legally imposed charges.
- Digital Sales / Refund Policy: Due to the instant digital nature of download products, sales are generally final once a download link or license key has been generated or delivered, subject to mandatory consumer rights.

- Exceptions may apply where a digital file is technically corrupted, broken, or non-functional and NÖRGRU cannot provide a working fix within seven (7) business days, or where a duplicate purchase was made accidentally within a 24-hour window.
- Nothing in this section limits mandatory refund, withdrawal, conformity, guarantee, or consumer rights that cannot lawfully be excluded.

7. SOFTWARE TOOLS AND EXECUTABLE APPLICATIONS

- Scope of License: Software is provided under the licensing scope stated on the applicable product page, ordinarily a single-user license unless a multi-seat, Indie/Team, Studio/Enterprise, or other license is purchased.
- Reverse Engineering: You may not decompile, reverse-engineer, disassemble, or attempt to derive source code from compiled software except to the extent permitted by applicable law.
- Updates: Software updates and bug fixes may be released at NÖRGRU's discretion and are provided on an "as-is" and "as-available" basis unless otherwise stated.
- Third-Party Dependencies: Software may depend upon third-party applications, libraries, services, operating systems, or technical environments outside NÖRGRU's control.

8. DISCLAIMERS AND LIMITATION OF LIABILITY

8.1 "As-Is" Provision

All Digital Content, software tools, and Services are provided on an "AS IS" and "AS AVAILABLE" basis without warranties of any kind, either express or implied, including but not limited to implied warranties of merchantability, fitness for a particular purpose, or non-infringement, except where mandatory law provides otherwise.

8.2 Limitation of Liability

To the maximum extent permitted by applicable law, NÖRGRU and its founders, affiliates, Contributors, employees, contractors, and representatives shall not be liable for indirect, incidental, special, consequential, or punitive damages—including loss of profits, data, or operational downtime—arising out of or related to use of or inability to use the Services or Digital Content.

8.3 Mandatory Law

Nothing in this Section excludes or limits liability, warranty, or consumer protection that cannot lawfully be excluded or limited.

9. TERMINATION OF AGREEMENT

NÖRGRU reserves the right, where permitted by applicable law, to suspend or terminate access to the Services or terminate rights under these Terms where a user breaches an explicit provision, including unauthorized redistribution, piracy, fraud, serious misconduct, confidentiality violations, or other material breaches.

Upon termination for breach, rights granted under these Terms may cease to the extent legally permitted, and the affected party must comply with applicable destruction, deletion, or access-restriction requirements, except where retention is required by law or a license provision expressly survives termination.

Contributor termination is additionally governed by Sections 4 and 5, including intellectual-property retention and removal rights.

10. GOVERNING LAW AND DISPUTE RESOLUTION

- Governing Law: These Terms shall be governed by applicable law without regard to conflict-of-law principles, subject to mandatory laws applicable to the relevant Customer, Contributor, Employee, or other user.
- Direct Negotiation First: Parties agree to attempt to resolve disputes informally through good-faith negotiation before initiating formal proceedings where legally permissible.
- Mandatory Rights: Nothing in this section prevents a consumer or other protected party from exercising mandatory rights or bringing proceedings in a jurisdiction where applicable law grants such rights.

11. CONTACT INFORMATION

- Brand: NÖRGRU™
- Website: norgru.eu
- Contact: contact@norgru.eu or designated contact channels on the Platform.

12. PRIVACY AND DATA

12.1 Collection of Information

NÖRGRU may collect and process information necessary to provide, operate, secure, and improve the Services, including account information, transaction information, Contributor information, technical information, and communications.

12.2 Payment Information

Payments may be processed by third-party providers such as PayPal, Stripe, Payhip, or other selected processors. NÖRGRU generally does not directly store complete payment-card numbers or full banking credentials.

12.3 Use of Personal Data

NÖRGRU may use information to manage accounts, process purchases and payouts, deliver Digital Content, communicate with users, prevent fraud and piracy, secure and improve Services, comply with legal obligations, and enforce agreements and intellectual-property rights.

12.4 Data Sharing and Third Parties

NÖRGRU may share information with trusted providers reasonably necessary for payment processing, distribution, hosting, analytics, communications, security, accounting, and other operations. NÖRGRU does not sell Customers' or Contributors' personal information as a standalone commercial product.

12.5 Cookies and Similar Technologies

NÖRGRU and third-party providers may use cookies, pixels, analytics tools, local storage, and similar technologies for sessions, preferences, security, functionality, and performance measurement. Where required, appropriate consent will be obtained.

12.6 Data Retention

NÖRGRU may retain information as reasonably necessary for service delivery, transaction records, disputes, fraud prevention, enforcement, legal or tax obligations, and legitimate business purposes.

12.7 Data Security

NÖRGRU takes reasonable technical and organizational measures designed to protect personal information, but no electronic system can be guaranteed completely secure.

12.8 International Data Transfers

Third-party providers may process information in countries different from the Customer's or Contributor's country. Where applicable, NÖRGRU will take reasonable steps to comply with applicable data-protection requirements.

12.9 Privacy Rights

Depending on jurisdiction, individuals may have rights including access, correction, deletion, restriction, objection, portability, withdrawal of consent, and complaint to a competent data-protection authority, subject to legal exceptions.

12.10 Children's Privacy

The Services are not intended for individuals under 18. NÖRGRU does not knowingly seek to collect personal information from children under 18.

12.11 Contributor and Customer Content

NÖRGRU may process information associated with Digital Content, listings, profiles, reviews, communications, and other materials as necessary to operate the marketplace. Contributors remain responsible for ensuring that submitted content does not unlawfully disclose another person's private information.

12.12 Privacy Policy

NÖRGRU may maintain a separate Privacy Policy containing additional details. Where there is a conflict, the Privacy Policy controls with respect to privacy and data-processing matters to the extent permitted by applicable law.

13. CONTRIBUTOR PARTICIPATION AND INFLUENCE ON COMPANY DIRECTION

13.1 Right to Propose and Contribute Ideas

Contributors are encouraged to propose ideas, recommendations, improvements, products, categories, services, business opportunities, operational changes, community initiatives, marketing strategies, technological developments, and other initiatives that may benefit NÖRGRU.

13.2 Consideration of Contributor Input

NÖRGRU will make a good-faith effort to consider constructive Contributor proposals. Feedback may influence content categories, pricing, licensing, marketplace structure, marketing, technology, Contributor programs, and strategic development.

13.3 No Guaranteed Decision-Making Authority

Participation and influence do not constitute ownership, partnership, employment, directorship, agency, or formal managerial authority unless established separately in writing. Contributors do not automatically receive equity, shares, voting rights, corporate authority, or power to bind NÖRGRU.

13.4 Final Authority and Company Direction

Unless otherwise established in writing, final authority regarding NÖRGRU's operations, strategic direction, legal affairs, finances, branding, commercial policies, partnerships, products, and services remains with the founder and/or legally authorized management.

13.5 No Obligation to Adopt Proposals

NÖRGRU does not guarantee adoption of any proposal. A proposal may be rejected, modified, postponed, combined, or implemented differently.

13.6 Intellectual Property in Contributor Proposals

Contributors retain ownership of pre-existing intellectual property. By voluntarily submitting a general business suggestion or proposal, the Contributor permits NÖRGRU to evaluate, discuss, develop, modify, combine, and implement the proposal for Company purposes without automatic compensation, royalties, equity, or attribution, unless separately agreed.

13.7 Future Governance and Expansion

As NÖRGRU grows, the Company may establish advisory groups, Contributor councils, consultations, voting mechanisms, representatives, or other governance structures. Their creation and modification remain subject to Company structure and applicable law.

13.8 Principle of Collaborative Development

NÖRGRU encourages Contributors to communicate ideas, identify problems, propose improvements, and participate constructively in discussions concerning the Company's future.

14. THE SPIRIT, PHILOSOPHY, AND RESPONSIBLE USE OF NÖRGRU

14.1 The Spirit of NÖRGRU

NÖRGRU is founded upon human ingenuity, technological ambition, disciplined creation, engineering excellence, exploration, and the pursuit of possibilities that may initially appear impossible. The Company seeks to represent a culture of invention rather than limitation.

14.2 Historical and Technological Inspiration

NÖRGRU may draw aesthetic, technological, historical, or philosophical inspiration from periods of exceptional technological development, including engineering, aerospace, rocketry, military technology, industrial design, advanced manufacturing, and other technical disciplines. Such interest concerns technological, engineering, organizational, or creative achievement and shall not be interpreted as endorsement, rehabilitation, glorification, or adoption of political ideology, racial doctrine, totalitarian regime, extremist organization, war crime, crime against humanity, persecution, or other unlawful or reprehensible conduct.

14.3 Innovation Without Ideological Allegiance

References to historical technologies, symbols, concepts, organizations, terminology, engineering programs, speculative technologies, or esoteric traditions may appear in creative, educational, artistic, or historical contexts and do not establish political affiliation or ideological allegiance.

14.4 The Pursuit of Human Greatness

NÖRGRU considers technological progress, creativity, engineering competence, scientific curiosity, craftsmanship, and intellectual independence to be positive expressions of human potential. The objective is transformation of imagination into reality through knowledge, engineering, creativity, and responsible execution.

14.5 NÖRGRU E-C-M-S-X-A Classification

- E — Energy: Energy systems, generation, storage, infrastructure, and related technologies.
- C — Civil: Civil engineering, infrastructure, transportation, utilities, and related applications.
- M — Military: Military-themed, defense-related, historical, speculative, or entertainment-oriented designs and Digital Content.
- S — Spatial: Aerospace, astronautics, orbital systems, spacecraft, planetary exploration, and related technologies.
- X — Xperimental: Experimental, unconventional, speculative, futuristic, or otherwise exploratory concepts.
- A — Architectural: Architecture, structures, environments, buildings, interiors, and related Digital Content.

These classifications describe subject matter or creative context and do not independently authorize manufacture, operation, deployment, or real-world use.

14.6 Digital Models Are Not Manufacturing Authorization

Digital Content does not constitute a manufacturing license, engineering certification, safety certification, regulatory approval, authorization to manufacture or operate a physical object, guarantee of physical performance, professional engineering advice, or representation of suitability for operational use.

14.7 Responsibility for Physical Manufacturing

Anyone who manufactures, fabricates, prints, machines, assembles, constructs, reproduces, or otherwise physically realizes an object represented by Digital Content does so at their own responsibility and is responsible for technical soundness, safety, tolerances, intended purpose, compliance, and lawful operation.

14.8 Downstream Use and Independent Responsibility

To the maximum extent permitted by law, NÖRGRU is not responsible for how Customers or third parties subsequently use, modify, reproduce, manufacture, distribute, or incorporate Digital Content after lawful acquisition. Customers remain responsible for legal, contractual, safety, intellectual-property, export-control, and other requirements.

14.9 Weapons, Defense, and Military-Themed Digital Content

Certain Digital Content may depict weapons, military equipment, defense systems, historical armaments, vehicles, spacecraft, experimental mechanisms, or military-themed objects for lawful creative applications such as games, simulation, film, visualization, historical reconstruction, education, collection, hobbyist projects, or miniature modeling. Such depiction does not itself constitute encouragement or authorization of unlawful violence or unlawful manufacture or use.

14.10 Hobbyist, Miniature, Film, and Simulation Applications

Highly detailed Digital Content may have legitimate applications in games, VFX, film, animation, VR, simulations, archviz, scale modeling, miniature modeling, education, and personal collections. Physical producers remain responsible for appropriate materials, processes, dimensions, tolerances, structural characteristics, and safety.

14.11 No Guarantee of Real-World Functionality

Mechanical plausibility or accuracy in a Digital Model does not guarantee physical functionality. Digital Content may contain simplifications, approximations, omissions, fictional elements, dimensional inconsistencies, or non-functional mechanisms.

14.12 Prohibited Misuse

Nothing in these Terms grants permission for unlawful purposes. Customers may not use Digital Content to facilitate terrorism, unlawful violence, criminal activity, prohibited weapons manufacture, or other unlawful conduct. Where credible evidence of prohibited use exists, NÖRGRU may take measures reasonably necessary to protect the Company, Contributors, Customers, and the public.

14.13 Principle of Responsible Power

NÖRGRU recognizes that technological capability can produce different consequences depending upon how it is directed. The Company preserves freedom to imagine ambitious possibilities while encouraging responsibility, legality, foresight, and respect for human life.

14.14 No Political or Extremist Affiliation

NÖRGRU is not a political organization, paramilitary organization, extremist organization, militia, ideological movement, or religious organization. Historical references, military aesthetics, technological symbolism, speculative concepts, or terminology do not establish political or extremist affiliation.

14.15 Scope of the Disclaimer

14.16 Product Edition Does Not Equal Engineering Validation

Level 1 and Level 2 Digital Content may be highly sophisticated, CAD-based, NURBS-based, mechanically detailed, or technically informative without constituting validated engineering documentation. CAD or NURBS geometry and technical file formats describe a method of digital representation and do not, by themselves, establish manufacturability, safety, certification, regulatory compliance, tolerances, material suitability, or operational functionality.

14.17 Manufacturing Transactions

Where NÖRGRU offers Level 3 — Manufacturing, the commercial transaction is governed by a separately negotiated Manufacturing License. NÖRGRU may require an NDA, identity verification, organizational information, intended-use information, project scope, territory, manufacturing quantity, technical requirements, and other information before granting access.

14.18 Manufacturing Content Delivery

Manufacturing Content may be delivered through a secure NÖRGRU-controlled client portal, authenticated digital environment, controlled cloud repository, temporary authorized download mechanism, encrypted electronic transfer, physical media, or another method designated or agreed by NÖRGRU. NÖRGRU does not guarantee use of any particular cloud provider or delivery technology for the lifetime of a project.

14.19 Access Credentials Are Product-Specific

Credentials or authorization issued for a Level 3 project are specific to the applicable Licensee, project, agreement, and authorized scope. Access to one Manufacturing project does not confer access to another project or to NÖRGRU internal systems.

This Section supplements, and does not replace, other disclaimers, limitations, licensing restrictions, and legal protections in these Terms. Mandatory legal duties, warranties, consumer protections, safety requirements, or liability rules prevail where applicable.

15. CONTRIBUTOR ASSET DISTRIBUTION AND PLATFORM EXCLUSIVITY

15.1 Authorized Distribution Platform

NÖRGRU will distribute and sell Contributor Digital Content through Payhip or another distribution infrastructure expressly designated by NÖRGRU. NÖRGRU will not independently upload, sell, resell, sublicense, or distribute a Contributor's Digital Content through unrelated third-party marketplaces or competing distribution platforms without the Contributor's prior knowledge and consent, unless otherwise agreed in writing.

15.2 Reason for Payhip Distribution

Payhip is currently used primarily to facilitate automated allocation and processing of Contributor revenue under the 60/40 arrangement.

15.3 No Independent Resale of Contributor Assets

NÖRGRU does not acquire ownership merely by listing or distributing a Contributor's Digital Content. Contributors retain the intellectual-property ownership described in Section 4.

15.4 Future Platform or Infrastructure Changes

NÖRGRU may replace or supplement Payhip with infrastructure providing greater control, automation, scalability, security, functionality, or integration, including an NÖRGRU-operated marketplace and payment-splitting or cloud infrastructure supplied by third parties. Such changes do not by themselves alter Contributor ownership, revenue-sharing percentages, or existing Customer licenses.

15.5 Notification of Material Distribution Changes

Where reasonably practicable, NÖRGRU will inform affected Contributors before a material change in the primary distribution infrastructure.

15.6 Internal NÖRGRU Marketplace

If NÖRGRU develops its own marketplace, storefront, payment infrastructure, or distribution system, Contributor Digital Content may be migrated from Payhip. Where technically and legally practicable, existing ownership, licensing, revenue-sharing, and other applicable rights will be preserved.

15.7 Third-Party Service Providers

NÖRGRU may use third-party providers for hosting, payment processing, security, delivery, databases, analytics, and other technical services. Such providers may process Digital Content only as reasonably necessary to provide services to NÖRGRU.

15.8 Contributor's Independent Activities

Contributors may independently sell, license, distribute, or promote their own Digital Content through other platforms, subject to Section 17 and any separate written agreement. This arrangement does not automatically impose platform exclusivity upon Contributors.

15.9 No Unauthorized Third-Party Marketplace Distribution

Except as authorized, NÖRGRU will not list Contributor Digital Content on external commercial platforms for independent sales generation. Material expansion of NÖRGRU's distribution channels will be communicated where reasonably practicable.

15.10 Continuity of Customer Licenses

Platform migration does not invalidate licenses lawfully granted to Customers before migration. Contributors retain ownership regardless of the distribution infrastructure used.

15.11 Platform Availability and Technical Changes

NÖRGRU does not guarantee indefinite availability of Payhip or any provider. Platforms may be modified, replaced, suspended, or discontinued for technical, commercial, security, legal, payment, policy, availability, cost, scalability, or strategic reasons.

15.12 Customer Access and Delivery

Customers may access purchased Digital Content through the applicable Payhip account or delivery system while Payhip is used by NÖRGRU. If NÖRGRU later operates direct account and delivery infrastructure, Customers may instead access eligible purchases through their NÖRGRU account or another NÖRGRU-designated system.

15.13 Purpose of the Distribution Structure

15.14 Level 3 Distribution and Controlled Access

Level 3 Manufacturing Content may be excluded from ordinary marketplace checkout and may instead be delivered through controlled access infrastructure. NÖRGRU may use product-specific portals, authenticated accounts, access logs, revision controls, download controls, and other reasonable technical and organizational measures.

15.15 Migration of Level 3 Infrastructure

NÖRGRU may change the infrastructure used to provide Level 3 access, including cloud storage, authentication, client portals, or delivery systems, provided that such changes do not by themselves alter the substantive rights granted under an applicable Manufacturing License Agreement.

The distribution structure is intended to maintain a transparent and sustainable relationship between NÖRGRU and Contributors while allowing the Company to develop increasingly independent infrastructure without diminishing Contributor ownership or agreed revenue-sharing rights.

16. CONTENT REVIEW, QUALITY STANDARDS, AND REMOVAL AUTHORITY

16.1 NÖRGRU’s Right to Curate Its Platform

NÖRGRU reserves the right to review, approve, reject, modify, suspend, delist, or permanently remove Digital Content, products, submissions, portfolios, or other materials proposed for publication or distribution. NÖRGRU is a curated creative and technological ecosystem, not an unrestricted repository in which every submission is automatically accepted.

16.2 Quality, Design, and Brand Standards

NÖRGRU maintains standards concerning visual presentation, technical quality, originality, coherence, documentation, usability, functionality, and overall character. Review may consider visual quality, technical integrity, accuracy, topology, organization, documentation, compatibility, originality, creative merit, professionalism, brand alignment, and contribution to the ecosystem.

16.3 No Automatic Acceptance of Contributor or Employee Content

Neither Contributors nor employees are automatically entitled to publication, listing, promotion, or distribution. NÖRGRU may apply standards regardless of identity, position, seniority, or prior relationship.

16.4 Right to Reject or Request Improvements

NÖRGRU may reject a product or request improvements, corrections, revisions, documentation, technical adjustments, or other changes before approval. A revision request does not transfer intellectual-property ownership.

16.5 Right to Delist or Remove Existing Content

NÖRGRU may suspend, delist, or remove content where it no longer meets quality standards, conflicts with current design direction, contains significant defects, is inadequately presented, becomes incompatible, creates substantial support/security/operational/reputational concerns, violates agreements, infringes or is reasonably alleged to infringe rights, contains unlawful material, becomes unsuitable for continued distribution, or conflicts with legitimate Platform operation.

16.6 Preservation of Contributor Ownership

Removal does not transfer ownership to NÖRGRU. Unless separately agreed, Contributors retain their intellectual-property rights.

16.7 Existing Customer Licenses

Removal does not retroactively invalidate licenses lawfully granted before removal, except where applicable law or these Terms permit otherwise.

16.8 Employees and Internal Creations

NÖRGRU may apply equivalent or stricter internal quality and design standards to creations produced by employees, contractors, officers, or personnel. Employment does not exempt work from quality control.

16.9 NÖRGRU's Curatorial Identity

NÖRGRU does not seek to maximize catalogue size merely to increase quantity. Quality, coherence, technical competence, visual distinction, and meaningful creative value may be prioritized over volume. A product may be rejected even if technically functional or commercially viable if it does not sufficiently align with NÖRGRU's quality, character, presentation, or creative direction.

16.10 No Obligation to Explain Every Editorial Decision

NÖRGRU may make curatorial, editorial, aesthetic, commercial, and strategic decisions. It may provide reasons where appropriate but is not required to disclose confidential internal criteria, competitive considerations, or proprietary evaluation methods.

16.11 Evolution of Quality Standards

Quality, design, technical, and presentation standards may evolve and become more demanding as NÖRGRU develops. Previously accepted products may therefore require improvement or re-evaluation.

16.12 Principle of Curated Excellence

NÖRGRU seeks to build a deliberately curated ecosystem reflecting ingenuity, craftsmanship, technical competence, visual quality, and purposeful design. Contributors and employees acknowledge that participation carries a responsibility to contribute to that standard. NÖRGRU may protect its identity through reasonable review, approval, revision, rejection, suspension, and removal, subject to applicable law.

17. PRICING, PRODUCT TIERS, AND NON-DISCRIMINATORY PRICING

17.1 Objective Product-Based Pricing

NÖRGRU pricing is determined according to objective characteristics of Digital Content or Services, including quality, refinement, complexity, development time, design, research, engineering, modeling, testing, documentation, technology, functionality, quantity, scope, and licensing requirements.

17.2 No Individual User Profiling for Product Pricing

NÖRGRU does not intend to determine a product's base price according to an individual Customer's perceived wealth, identity, personal characteristics, browsing behavior, purchasing history, demographic profile, or other individualized user profile. The same product and applicable licensing tier are generally offered at the same listed price to Customers under the same conditions.

17.3 Product Packaging and Complexity

Different packages or versions may be priced differently according to complexity, scope, functionality, detail, quantity, resolution, included components, or other objectively identifiable characteristics.

17.4 Personal License

- Maximum authorized users: 1 user.
- Intended for personal, educational, hobbyist, freelance, or other permitted activities.
- May not be shared, transferred, sublicensed, or used to provide unauthorized access.

17.5 Indie / Team License

- Maximum authorized users: 5 users.
- Intended for small independent teams, studios, businesses, development groups, or similar organizations.
- Access may not exceed the purchased user limit.

17.6 Studio / Enterprise License

- Maximum authorized users: 15 users.
- Intended for larger professional teams, studios, companies, organizations, or enterprise users.
- Additional licensing arrangements may be negotiated for organizations requiring more than fifteen users.

17.7 License Tier Pricing

Different tiers may carry different prices because they grant different scopes of authorized use. Higher pricing reflects broader licensing rights and user capacity rather than individualized pricing.

17.8 Equal Application of Published Prices

Where a product and licensing tier are publicly offered at a stated price, NÖRGRU generally applies that price equally to Customers purchasing under the same conditions. This does not prevent enterprise quotations, volume arrangements, promotions, or other expressly defined commercial arrangements.

17.9 Discounts and Promotional Pricing

NÖRGRU may temporarily reduce prices for company promotions, product launches, seasonal events, public holidays, festivities, anniversaries, special events, limited-time campaigns, marketplace promotions, new-product introductions, discontinuations, or other Company-determined circumstances.

17.10 No Guaranteed Lowest Price

NÖRGRU does not guarantee that a Customer will receive the lowest historical or future price. A later discount or promotion does not ordinarily entitle a prior purchaser to a price difference refund except where required by law or expressly stated.

17.11 Taxes, Currency, and Payment Processing

Final amounts may differ due to VAT, sales taxes, duties, currency conversion, payment-processing conditions, or legally required charges. Such differences are not individualized profiling where they arise from objective legal or transaction circumstances.

17.12 Changes to Pricing

NÖRGRU may establish, modify, increase, decrease, or discontinue prices prospectively. Completed purchases are not retroactively repriced unless otherwise required by law or expressly agreed.

17.13 Contributor Price Proposal and NÖRGRU Approval

A Contributor may propose the price of their own Digital Content based on the work, complexity, quality, technology, time, scope, and value involved. NÖRGRU retains final approval authority over the published price where necessary to maintain coherent marketplace standards, minimum pricing policies, commercial positioning, or the Company's overall vision.

NÖRGRU may decline a proposed price, request an adjustment, or establish a different published price following discussion with the Contributor.

17.14 Minimum and Value-Based Pricing Standards

NÖRGRU may establish minimum pricing standards or exceptions for specific products, categories, bundles, promotions, or strategic circumstances. As an operational example, NÖRGRU may generally avoid publishing products below €9.99 unless a specific exception is approved.

17.15 Principle of Transparent Value

17.16 Manufacturing License Pricing

Level 3 Manufacturing transactions may be priced through quotation or negotiation based on objective characteristics of the rights and technical package, including scope, technical maturity, engineering status, development stage, field of use, territory, duration, exclusivity, manufacturing quantity, commercialization rights, support obligations, documentation, validation status, and other objectively identifiable factors.

Such pricing is based on the transaction and rights requested, not on the personal identity or perceived wealth of the Customer.

NÖRGRU's pricing philosophy is intended to reflect the value, complexity, effort, technology, craftsmanship, and scope contained within a product rather than the identity of the person purchasing it.

The product determines the price; the Customer's identity does not. Nothing in this Section permits pricing practices prohibited by applicable consumer-protection, anti-discrimination, privacy, competition, or other laws.

18. NÖRGRU ASSISTANT, INTERNAL RESOURCES, AND PROGRESSION

18.1 Purpose of NÖRGRU Assistant

NÖRGRU Assistant is an internal dashboard and portal intended to provide approved Team Members with operational, educational, analytical, and creative resources supporting their participation in NÖRGRU.

18.2 Access Is Approval-Based

NÖRGRU Assistant is not intended to operate as an unrestricted public registration service. Team Member email addresses or accounts may be pre-authorized by NÖRGRU following the applicable Contributor, Employee, hiring, or onboarding process.

18.3 Dashboard Resources

Depending on the Team Member's access level and the Company's current configuration, NÖRGRU Assistant may provide access to sales statistics, revenue information, learning materials, video tutorials, books, internal assets, alpha brushes, documentation, announcements, tools, and other resources.

18.4 Contributor Sales and Revenue Statistics

Approved Contributors may receive access to statistics relating to their own products, including sales, revenue, and other performance information made available through NÖRGRU Assistant. Dashboard functionality may evolve over time.

18.5 Content-Based Progression System

NÖRGRU may use a content-based progression system to determine access to certain internal resources. Progression is based on approved Digital Content submitted by the Team Member, rather than merely on registration or expression of interest.

As an exemplary current configuration, a Contributor may progressively unlock additional resources as approved products are submitted, with full access potentially becoming available after approximately twelve (12) approved models. This number is illustrative and may be changed by NÖRGRU as the system develops.

18.6 Removal and Progression Status

If a Contributor later requests removal of an approved asset that contributed to their progression level, the removal may reduce their progression status accordingly. For example, removal of a twelfth approved

asset may cause the Contributor to move backward on the applicable progression ladder. Such removal does not penalize the Contributor's ownership rights or their right to request delisting.

18.7 Early-Stage Educational Access

NÖRGRU may grant limited NÖRGRU Assistant access to early-stage inventors, artists, designers, or other individuals for learning, orientation, educational, or developmental purposes even before they become active Contributors. Such access may be limited and does not itself establish Contributor or Employee status.

18.8 Manual Access Adjustments

NÖRGRU may manually unlock, restrict, expand, or adjust dashboard access where reasonably appropriate, including for onboarding, educational purposes, special projects, demonstrated contribution, operational requirements, or other Company decisions.

18.9 Internal Nature of Dashboard Materials

Materials accessible through NÖRGRU Assistant may be confidential, proprietary, unpublished, licensed, or otherwise restricted. Access does not grant ownership or permission to redistribute such materials.

18.10 Suspension or Removal of Access

NÖRGRU may suspend or remove access to NÖRGRU Assistant where participation ends, access requirements are no longer met, confidentiality is breached, security is compromised, misuse occurs, or other legitimate operational reasons require it.

19. CONFIDENTIALITY AND NON-DISCLOSURE

19.1 NDA Requirement

NÖRGRU may require Contributors, Employees, Contractors, and other Team Members to execute a separate Non-Disclosure Agreement ("NDA") before receiving access to confidential or internal Company information.

19.2 Form of NDA

An NDA may be signed physically, electronically, digitally, or through another legally recognized acceptance mechanism. The exact confidentiality obligations are governed by the applicable NDA in addition to these Terms.

19.3 Examples of Confidential Information

Confidential Information may include, without limitation:

- NÖRGRU Assistant dashboards and internal systems.
- Sales statistics, revenue information, analytics, and internal financial information.
- Unreleased products, prototypes, concepts, designs, technologies, software, and technical systems.
- Internal assets, learning resources, documentation, books, tutorials, alpha brushes, and other non-public materials.

- Business plans, strategies, partnerships, operational methods, pricing discussions, marketing plans, and future projects.
- Non-public Contributor, Customer, Employee, or Company information.
- Other information reasonably understood to be confidential or designated as confidential.

19.4 Authorized Use Only

Confidential Information may be used only for legitimate NÖRGRU-related purposes for which access was granted. Team Members shall not intentionally disclose, publish, sell, redistribute, exploit, or otherwise misuse confidential information.

19.5 Consequences of Proven Misconduct

NÖRGRU considers honesty, loyalty, integrity, and responsible handling of internal information fundamental to participation in the Company. Where a Team Member is proven to have deliberately breached confidentiality, acted dishonestly, or misused confidential resources, NÖRGRU may suspend or terminate their participation and remove access to internal systems.

NÖRGRU's ordinary internal response is exclusion from the relevant team or Contributor ecosystem. Nothing in these Terms or an NDA should be interpreted as a waiver of legal rights or remedies that may be required or appropriate under applicable law.

19.6 Survival of Confidentiality

19.7 Level 3 Client Confidentiality

A prospective or actual Manufacturing Licensee may be required to execute a separate client-facing NDA before receiving confidential technical information, project documentation, controlled Manufacturing Content, or access to a Level 3 Portal. The client NDA may impose obligations concerning representatives, security, permitted purpose, disclosures, return or destruction, incident notification, and survival.

19.8 Portal and Access Information

Project credentials, access links, portal structure, revision information, download records, technical package organization, and other non-public information associated with a Level 3 project may themselves constitute Confidential Information.

Confidentiality obligations continue according to the applicable NDA and, where applicable, survive termination of a Contributor, Employee, or Team Member relationship.

20. CONTRIBUTOR BENEFITS, SOFTWARE LICENSES, AND COMPANY RESOURCES

20.1 Discretionary Company Support

NÖRGRU may, at its discretion, provide Contributors, Employees, or other Team Members with resources intended to support their creative, technical, educational, or professional work.

20.2 Software and Licensed Tools

Such resources may include software licenses, subscriptions, plugins, development tools, educational platforms, assets, or other services that NÖRGRU acquires or pays for on behalf of an eligible Team Member.

20.3 No Automatic Entitlement

The provision of any software, subscription, license, asset, or other resource is discretionary unless expressly established in a separate written agreement. NÖRGRU may determine eligibility, scope, duration, and permitted use.

20.4 Third-Party License Conditions

Where a resource is supplied by a third party, the Team Member must comply with that provider's applicable license terms. NÖRGRU does not transfer ownership of third-party intellectual property merely by paying for or facilitating access.

20.5 End of Participation

Unless otherwise agreed or permitted by the relevant third-party license, access to Company-funded resources may end when the Contributor, Employee, or Team Member relationship ends.

20.6 Purpose

NÖRGRU may use such benefits to encourage technical development, improve product quality, support learning, reward contribution, and strengthen the capabilities of its creative and engineering community.

21. GENERAL PROVISIONS

21.1 Entire Agreement

These Terms, together with any applicable product license, Privacy Policy, NDA, Contributor Agreement, employment agreement, or other written agreement expressly incorporated by reference, constitute the applicable contractual framework governing the relevant relationship.

21.2 Separate Agreements

Where a separate written agreement expressly conflicts with these Terms regarding a specific relationship or transaction, the separate agreement controls to the extent of that conflict.

21.3 Severability

If any provision is determined to be invalid, unlawful, or unenforceable, the remaining provisions shall remain in effect to the maximum extent permitted by applicable law.

21.4 Amendments

NÖRGRU may update these Terms as the Company, Services, technology, legal requirements, or business structure evolve. Material changes may be communicated through the Platform, email, account notifications, or other reasonable channels.

21.5 No Waiver

Failure by NÖRGRU to enforce a provision on one occasion does not constitute a permanent waiver of its right to enforce that provision later.

21.6 Responsible Interpretation

21.7 Manufacturing License Priority

For a Level 3 transaction, the applicable Manufacturing License Agreement, together with any expressly incorporated client NDA, project schedule, technical specification, or other written agreement, governs the specific rights and obligations of that transaction. If an express conflict exists, the transaction-specific written agreement controls to the extent of the conflict, subject to mandatory law.

These Terms are intended to establish a transparent, coherent, and sustainable framework for Customers, Contributors, Employees, and NÖRGRU. Mandatory legal rights and obligations prevail wherever applicable law requires.

NÖRGRU-OWNED CONTENT AND EXTERNAL DISTRIBUTION

NÖRGRU may independently create, own, commission, publish, market, license, and sell its own 3D assets, applications, software, plugins, Unreal Engine assets, Blender scenes, environments, props, technical products, and other Digital Content through NÖRGRU and through External Distribution Platforms such as Gumroad, ArtStation, SuperHive, or other platforms selected by NÖRGRU.

Such NÖRGRU-Owned Content is distinct from Contributor-Owned Content and is not subject to the Contributor revenue-share or Contributor ownership rules unless a separate written agreement expressly states otherwise.

Contributor-Owned Content may be distributed through third-party platforms only to the extent authorized by the applicable Contributor Agreement or other express written authority.
